

What's in the box?

Misaki Tuna

*This sheet has been written about how to thaw and cut.

How to thaw and cut

Wrap Tuna in the kitchen paper or towel, and put the plastic wrap around it. Then, put it in the refrigerator to thaw. It will take about 5-6 hours depending on the size of tuna. Best is to thaw half way to three-quartered. After thawing, please consume it on same day, and do not re-freeze it. Cut vertical to the fiber.
